Dear Friends,

The coronavirus (COVID-19) infection is now a global pandemic, and having a major and severe impact on all of our lives. Unfortunately, efforts to contain the virus, and treat it have not been successful to date – though we all hope that they will be soon. Our best wishes and deepest sympathy go out to everyone who is affected.

In the light of this crisis, and the widespread limitations and bans on travel, the SFRR-Europe Executive, in consultation with the meeting organisers, have taken the decision to **postpone** the meeting planned to be held in Belgrade, Serbia, this summer.

We apologize to the many people who have invested a lot of time and effort in planning this meeting – and particularly to the local organizing committee, our valued sponsors, the symposia organisers, the invited speakers, presenters and delegates.

In order to make good use of all of the excellent efforts made by Prof. Bato Korac and colleagues in preparing and organizing what had promised to be a very exciting scientific and enjoyable meeting, the Executive have taken the decision to push back the planned meeting schedule for SFRR-Europe, so that the new plan for our annual meetings is now as follows:

2021: June 15-18, Belgrade, Serbia – with local organizer Bato Korac.

2022: Liege, Belgium – a joint meeting with the Plant Oxygen Group (POG) – with local organizers Joel Pincemail (SFRRE), and Frank Van Breusegem (POG)

2023: Vienna, Austria – with local organizer Florian Gruber

We look forward to seeing you all in Belgrade next year.

With very best wishes for your good health and happiness in these difficult times.

Michael Davies
President
